

# WEEKLY EVENTS

## 'Rapid Reptiles'

The visit from Rapid Reptiles to Nursery, Kindergarten and Reception last week was a huge success. The children from Nursery were a little unsure at first when the bearded dragon lizards, Rhubarb and Custard, approached but they soon relaxed and enjoyed looking at, finding out about and even touching the snakes, lizards and tortoises. Mrs Williams and Mrs Chen looked at home with snakes around their necks !

Kindergarten and Reception were a little bolder with most children stroking or holding the lizards - some even put a snake around their neck!! The tarantula stayed in its tank - for obvious reasons - but was a treat to see. The jungle cockroaches(harmless but rather large) hissed as the children handled them! It was interesting to find out about what the reptiles eat. There were lizards, gecko's, a python, a corn snake and they children saw snake eggs and skins too.
