

## OUR FOREST CAMP – SUMMER 2010

This summer the children who attended our summer camp were able to share in the joy of outside Learning. They learned how to put up tents and how to make a shelter out of sticks; they created a pond environment; learned how to make a camp fire; made houses for 'ants'; made a magic carpet and magic potions; they created their own woodland adventure story; they made bird nests and jewellery and had so much fun that each day they were eager to learn more.
