'NURSERY AND KINDERGARTEN OUTSIDE AREA'

During the summer the refurbishment of our outside area has been completed. The children were very happy and excited to return to a new “tree house” with a slide; a shop underneath; a fitness trail; a log cabin which has proven very popular for all kinds of role play as well as providing an opportunity for getting away from the action or for quieter conversation. The old faithful sand pit has been replaced by a replica with higher sides and the new lid allows for use as a stage when closed!

In addition we have two sensory boxes which can be filled with different materials; one is planned for mud play and one for pebbles and shells. We also have three discovery trays being installed for creating all sorts of environments or for exploring and experimenting with slopes.

Gardening is high on the agenda with new garden tools, storage and planters. The children have already been out with green-fingered Mrs Chipperfield planting.

The children can look forward to being able to access active adventure play and discover more about nature all year round.
